

REX TECHNOLOGY SOLUTIONS DBA

SuperDroid Robots

For over 20 years, we've helped government agencies make dangerous, dirty, & dull tasks safer, cleaner, and more effective, which continues to save lives, reduce injuries, and improve employee retention.

We're a group of engineers, fabricators, technicians, and robotic enthusiasts that are all passionate about robots. We've used our passion, decades of experience, and hands-on expertise to build thousands of robots that solve real-world challenges with robots.

DESIGNED & BUILT IN THE US ALL-AMERICAN ROBOTS

NAICS Codes for Robotics

- + 541511 - Custom Computer Programming Services
- + 423830 - Industrial Machinery and Equipment Merchant Wholesalers
- + 541715 - Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)
- + 541330 - Engineering Services

SIC Codes for Robotics

- + 7371 - Computer Programming Services
- + 5084 - Industrial Machinery and Equipment
- + 5085 - Industrial Supplies
- + 8711 - Engineering Services
- + 8748 - Business Consulting Services, Not Elsewhere Classified

Company Snapshot

Business Name: SuperDroids Robots
Business Address: 224 Technology Park Lane,
Fuquay Varina, NC 27526
Point of Contact: Aaron Cockrell
Phone: +1 (919) 557-9162
Email: orders@sdrobots.com
Web: www.SuperDroidRobots.com

Compact Inspection Robots

Robots to inspect inaccessible areas such as crawlspaces, drop ceilings, air ducts, culverts, under vehicles (security), and beneath heavy machinery.

Industrial Inspection Robots

Rugged inspection robots used for visual inspections, detecting harmful gases, or thermal imaging in industrial settings.

Reality Capture Robots

Use a robot to expedite or even automate reality capture scanning of construction jobsites or mapping of facilities.

Autonomous Mobile Robots (AMR)

Robots that automate processes including transporting materials, object recognition, and inspections.

Tactical Robots

SWAT, EOD, & HAZMAT teams use these robots to clear rooms, dispose of hazardous materials, and provide surveillance.

Material Handling Robots

Safely transport materials autonomously, remotely, or via remote control indoors or outdoors.

Telepresence Humanoid Robots

Workers can operate a two-armed, biped robot to perform dangerous or dirty tasks remotely from a safe location. Also utilized by injured or disabled workers.

Custom Robot

We customize one of our models or build custom robots to solve your unique challenges and specific use cases such as detecting radioactive materials or scanning mines.

+ All robots are NDAA Compliant and designed & built in the US
